About the T-JTA®

The Taylor-Johnson Temperament Analysis® (T-JTA®) is a widely used personality assessment for individual, pre-marital, marital, and family counseling. The T-JTA measures 16 dimensions of personality (9 bipolar traits) that are important in individual adjustment and interpersonal relationships. For over 50 years, the T-JTA has been used by hundreds of thousands of counseling professionals in a wide array of settings in the U.S. and around the world to help people understand themselves and others in their lives.

Learn More

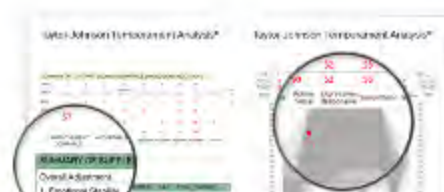

T-JTA Benefits

- ✓ **Illuminating:** Identifies problems that are difficult for clients to articulate, fostering awareness and insight.
- ✓ **Accessible:** Produces graphical results that are easy for counselors to explain and clients to understand.
- ✓ **Efficient:** Brings to light core issues and establishes rapport within hours instead of months.
- ✓ **Flexible:** Can be taken online using any internet-connected device, or offline using paper materials.
- ✓ **Valid and Reliable:** Backed by 50 years of research, multiple correlation studies, and frequent restandardization.

Read Testimonials

A Profile is Worth a Thousand Words

Like an emotional x-ray, the T-JTA Profile displays in graphical terms the landscape of one's temperament. Its visual presentation is immediately accessible and communicative to clients, making it an ideal visual aid for use within

immediately accessible and communicative to clients, making it an ideal visual aid for use within the counseling session. Combined with detailed counselor reports, the T-JTA gives you results that are equal parts concise and comprehensive. For both counselor and client, the T-JTA accomplishes in one sitting what can otherwise take months to achieve.

View Samples

Online Scoring

With T-JTA Online, Testing is as easy as 1-2-3:

1. Client logs in to testing website.
2. Client completes the T-JTA on any computer, phone or tablet.
3. You receive test results within one business day.

Optimise India's renewable energy and reforestation projects, by making land planning a key part of the policy mix

Times of India, New Delhi | January 21st, 2020

By [Sneha Paul](#), MD and [Rajesh Kulkarni](#), Ecological Scientist, TNC

An analysis conducted by The Nature Conservancy (TNC) and the Center for Study of Science, Technology and Policy (CSSTP) demonstrates that India can meet its renewable energy target of 175 GW by 2022 by placing renewable energy infrastructure on a select degraded lands which pose a lower conflict. Our study's view that there are enough lower conflict lands to generate more than 13 times our 2022 renewable energy target. This is a significant opportunity as our country scales up renewable energy production; the study highlights the need for judicious land use planning that will lower potential land conflicts that could delay renewable energy development and increase project costs.

Empowering Farmers To Practice No-Burn Agriculture

Agriculture World, November 2019

By [Sneha Paul](#), Managing Director, TNC India and [Rajesh Kulkarni](#), Ecological Scientist, TNC

The hazardous air quality in North-West India is yet again in the international news this year. Crop residue burning is a significant contributor, among many others, that have caused the National Capital of India to be enveloped in smog. The Nature Conservancy India is working with a consortium of partners and an impressive group of farmers in Punjab and Haryana who are committed to stopping the crop residue burning that impacts their health and agricultural productivity. Read more about our collaborative work which has been featured in the November, 2019 issue of Agriculture World.

End to crop burning is achievable and farmers can lead the way

Times of India, New Delhi | November 18, 2017

By [Sneha Paul](#), Managing Director, TNC India and [Rajesh Kulkarni](#), Ecological Scientist, TNC

Crop residue burning is a major source of air pollution in north west India during the winter months. Any solution to this burning issue must address economic, behavioral, and financial barriers that farmers face in sustainably disposing crop residue. This national article highlights the potential for an agricultural technology – the Happy Seeder – to enable large scale in situ management of crop residue, thereby eliminating the need to burn while also providing co-benefits to farmers.

Leading for the Future - Paving the Way for National LED Adoption

Alliance for Energy Efficient Economy

Website

AEEE is a policy advocacy and energy efficiency market enabler dedicated to meeting India's commitments to the 2030 nationally determined goals (NDC) and UN sustainable developmental goals (SDG).

[About AEEE](#) [Membership](#) [Themes](#) [Projects](#) [Events & News](#) [Media](#) [Blog](#) [Contact](#) [Newsletter](#)

AEEE office is now
**LEED
Platinum (ID+C)
certified**

Alliance for an Energy Efficient Economy (AEEE), a not-for-profit organization in India that works on creating awareness about energy efficiency as a resource. It's a policy advocate and energy efficiency market enabler with a not-for-profit motive. We advocate for data-driven and evidence-based energy efficiency policies and research working across industry, government and civil society to foster a culture of energy efficiency in India. AEEE advocates for Thermal Comfort for All, Lean-Mean-Green philosophy to design and construct net-zero energy water waste built environment, Sustainable Transportation, Energy Data Framework for better policymaking and implementation to build a culture of energy efficiency in India. We are committed to achieve India's energy transition for a climate-resilient and energy secure future and meet India's commitments to the 2030 nationally determined goals (NDC) and UN sustainable developmental goals (SDG).

**Transitioning
to a Climate
Resilient &
Energy Secure
Future**

Our Core Values

Our Vision

Transitioning to a Climate Resilient and Energy Secure Future

Our Mission

- Foster a culture of energy efficiency in India
- Enable Energy Transition by working across industry, government and research/civil society organization
- Accelerate impact as a policy enabler through thought leadership and research to meet India's 2030 Nationally Determined Contribution (NDCs) and Sustainable Development Goals (SDGs)

Our Focus Areas

Buildings and Communities

The building sector in India is experiencing unprecedented growth and is likely to add about \$5 billion of new floor area by 2050. Presently, according to the Bureau of Energy Efficiency (BEE), the building sector accounts for approximately 35% of total energy consumption and is growing at nearly 8% annually. India also faces exponential growth in cooling demands – currently it has one of the lowest per capita kWh consumption for space cooling despite having extreme high cooling needs. Providing thermal comfort, reliable electricity and nutritional food to all its citizens is a key challenge and also a pressing priority. It is offering emerging opportunities for more future-ready buildings and habitable communities – with sustainable building energy codes, net-zero energy, and net-zero carbon buildings (low-energy cooling innovations, and sustainable cold chain infrastructure).

Power Utility & Electric Mobility

In India's carbon-constrained world, electricity and mobility become one of the couple of transformations, aided by a rapid decline in battery cost, and enabled by smart grids and advanced control & communication technology. The way electricity is generated, distributed and consumed is undergoing major transformation with deployment of Distributed Energy Resources (DER), implementation of Demand Side Management (DSM) (Demand Response) (DR) measures and adoption of innovative business models. Additionally, the transport sector is witnessing a paradigm shift, with electrification of vehicles. In this new vision, strong infrastructure, which closely binds mobility with the electricity sector, throws some serious challenges as well as opens a new frontier of opportunities. As sectors are getting interconnected, the synergy between different players to cater to the energy requirements of the 21st Century is critical.

Industrial Energy Efficiency

The industry sector contributes to almost 30% of the total GHG emissions in the country. Developing strategies for decarbonising manufacturing industries through innovations in technology, process interventions, and fuel shift options is thus, a national priority. The industrial efficiency interventions and circular economy principles when applied to the demand sectors can give directions for reducing the demand and in turn will result in net-zero emissions.

State and Local Actions

The Energy Conservation Act, 2001 created State Designated Agencies (SDAAs) in every state and empowered them to coordinate, regulate and enforce the provisions of the Act within each state. Following this, states have taken initiatives to create awareness and implement energy efficiency policies. The challenge is, in realizing actual energy savings by shifting gears from policies in place to techniques successfully implemented. A robust energy data management system is required for monitoring & verifying the impact of existing policies and to formulate new policy measures.

Industry Platform & Business Creation

AEEE is a converging platform bringing key energy stakeholders – Industry, government, civil society, and professionals, together to engage in a constructive dialogue to influence effective and impactful policies and build a robust ecosystem for effective implementation. This includes innovation in business models and easy access to financing that will lead to market transformation for energy efficiency technologies. AEEE currently has 45 members from diverse sectors. Our extensive network with different stakeholders help our members mobilize potential partnerships, workspace, and resources.

Why Us

Simple

Simply Secure Sign's development, guidance, and training make it an easy-to-use solution for all users. From Simple Secure Sign, transform the closing process, without disrupting the entire business.

Secure

Simply Secure Sign's advanced eSigning platform is highly secure, providing secure services. It supports secure, non-repudiation, and audit trails for all types of traditional, hybrid, and full eClosing. Simply Secure Sign supports natural signatures and digital notary seal for in-person, notarized closing, and remote signing, only bylaws.

Flexible

Simply Secure Sign has a multi-compliance engine which can be configured to meet the State and County level and can be configured by lender and document type.

Welcome to Simply Secure Sign!

Simply Secure Sign is a leading eClosing platform, known as World Wide Mortgage has become the nation's leading eClosing vendor and is ranked in 1st place by closing volume with over 100,000 closings per month. And since Simply Secure Sign has completed over 100,000 closings, including the first home loan in Texas to require the first mortgage, it is a leading eClosing platform.

Register

Eligibility Engine

The Simply Secure Sign Eligibility Engine provides a comprehensive set of rules to guide the lender's mortgage process, including the ability to track the status of the loan.

We Can Support Your Equipment Leasing & Financing Goals Quickly..

- ✓ Equipment Loans
- ✓ Capital Leases
- ✓ Operating Leases
- ✓ Solar Operating Leases
- ✓ Power Purchase Agreements (PPA)
- ✓ Aircraft Finance Programs
- ✓ Customized Vendor Programs
- ✓ Internet credit review for instant analysis
- ✓ Fast approval process for business lending

First US Finance LLC is an equipment leasing and equipment financing company created to fill the gap left by commercial lenders and other equipment leasing companies. Our investor and wholesale funding partners help private companies, municipalities and non-profit groups obtain business financing throughout the United States. We are an innovative finance company based in California with expertise in the industrial machine, technology and energy markets. We offer equipment leasing, capital leases, project finance, business loans and working capital for growing companies and approve them more quickly and effectively than traditional leasing companies. In addition to commercial lending, we offer a variety of business finance and commercial loan solutions.

What Our Clients Say...

Lessee was a great resource, always available with answers and guidance of the finance process. We closed the deal within a week of filing our application. I recommend Lester & First US Finance to any business with financing needs. - **TIM BROWN** - Tim Brown Architecture

"First US Finance financed me online. I had a complex with new audio, video, LED lighting and walling and with better terms and rate than I had hoped for. I'm a lifetime client! Thank you!" - **LARRY RUTAN** - Ted's Grillz - Corona

"I'm whole heartedly thanking you for our debt program. It could not have been achieved this level of greatness had it not been for you and First US Finance." - **TERRY NORRIS** - Super Market

"I recommend Lester to all business owners looking for a solid provider of equipment financing. He's extremely professional, knowledgeable and meets quickly!" - **ALEX MACH** - Mortgage Office

CONSERVE CASH - PAY MORE, SAVE MORE

The stated rate looks good, but some business owners are making cash decisions. All owners want to pay the lowest rate possible, but we've seen some work hard to qualify for a good rate, providing all the requested documentation and then find that the term of the finance just because they are 11.

Service and Success Go Hand in Hand

As business people we all produce a product or offer a service for sale. For a time and realize a profit. Our intention should be to gain a fair return based on how much time, expertise, energy and materials we have to invest in making our products. In the U.S.

Choosing the Right Path

The Skin Pathology Laboratory has provided superior diagnostic service since 1986. Our board-certified dermatopathologists, Drs. Jag Bhawan, Lynne Goldberg, and Deon Wolpowitz have over 70 years of combined experience in the histologic diagnosis of skin diseases, and are also board-certified dermatologists involved in direct patient care. They have additional expertise in alopecia, bullous disorders, cutaneous nerves, infectious diseases, melanocytic lesions, and lymphoproliferative disorders, among others. The entire team at SPL takes pride in the quality and accuracy of our work in order to promote exceptional patient care.
